Senior Full-Stack Software Engineer | JavaScript / TypeScript Specialist

PROFESSIONAL SUMMARY

Senior Full-Stack Software Engineer architecting and delivering scalable web applications using JavaScript, TypeScript, React, and Node.js. Proven technical leader with hands-on expertise in AI-augmented development workflows, including Claude API and CLI integrations, AI-powered GitHub Actions pipelines, and autonomous agent tooling using Claude's native agents, commands, and hooks framework, all of which measurably accelerate team velocity and code quality. Experienced owning features end-to-end across startup and enterprise environments, with a strong track record of cross-functional collaboration, system architecture, and production-grade delivery.

CORE COMPETENCIES

Full-Stack Development (React, Node.js, TypeScript)	RESTful API & GraphQL Design	CI/CD Pipeline Implementation
Agile / Scrum Methodologies	Database Design & Query Optimization	Test-Driven Development (TDD)
Cloud Infrastructure (AWS)	SAML / SSO Authentication	UI/UX Implementation & Responsive Design

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Python
Frontend	React, Redux, React Native, Angular, Vue.js, Tamagui, Apollo Client, GraphQL
Backend	Node.js, Express.js, RESTful APIs, GraphQL, Sequelize, SQLAlchemy, Pytest
Databases	PostgreSQL, MySQL (AWS RDS), MongoDB / NoSQL, Firebase / Firestore
Cloud & DevOps	AWS (EC2, RDS, S3), Docker, CI/CD Pipelines, Git, GitHub, GitLab, Bitbucket
AI & Automation	Claude API, Claude CLI, Anthropic Agents / Commands / Hooks, AI-Powered GitHub Actions, Automated Code Review Pipelines, LLM Workflow Integration
Tools	Jira, Confluence, Figma, Adobe Creative Suite, Twilio, Headless CMS, WordPress

PROFESSIONAL EXPERIENCE

Sanctuary Innovations | Remote, United States December 2025 – Present

Senior Full-Stack Software Engineer

- Own the full software development lifecycle across multiple simultaneous product initiatives, spanning requirements gathering, system design, implementation, QA, and production deployment.
- Architect and build React/TypeScript front-end applications and Node.js RESTful APIs, leveraging AWS (EC2, RDS, S3) and PostgreSQL for scalable, reliable back-end infrastructure.
- Leverage Claude CLI and the Claude API personally throughout the development process, utilizing Claude's native agents, commands, and hooks framework to streamline workflows, accelerate feature delivery, and maintain high code quality independently.
- Establish coding standards, conduct code reviews, and drive technical decision-making to maintain high code quality and team velocity.

Closed Loop AI | Austin, TX 2024 – January 2026

Full-Stack Software Engineer

- Architected and deployed full-stack features using React and Node.js, increasing user engagement by 25% through improved application performance and UX.

- Designed and optimized scalable RESTful backend services, reducing average API response times by 30% through query tuning and caching strategies.
- Built AI-augmented GitHub Actions workflows integrating the Claude API, including automated code review and LLM-assisted QA pipelines, reducing review overhead and accelerating release cycles by 40%.
- Partnered with product and design teams to scope and deliver new features, contributing to a 15% increase in customer satisfaction scores.

Anthem Health | Remote, United States 2022 – 2023

Full-Stack Software Engineer

- Developed and maintained enterprise-scale web applications using Angular and TypeScript, improving overall application performance by 20%.
- Optimized SQL database queries and server-side processes, achieving a 35% reduction in server load and improving response throughput.
- Collaborated with UX designers to refine and implement accessible user interfaces, resulting in a 10% improvement in user retention.
- Delivered sprint commitments consistently ahead of schedule within an Agile/Scrum environment.

Independent Software Engineer | Remote, United States 2021 – 2024

Full-Stack Software Engineer (Contract)

- Designed and developed custom web applications for clients using React and Node.js, maintaining a 100% client satisfaction rate across all engagements.
- Integrated third-party APIs and payment/communication services to extend application functionality and enhance end-user experiences.
- Led code reviews and mentored junior developers, promoting best practices in TDD, code quality, and documentation.

Overnight Printing | Seattle, WA 2021 – 2022

Principal Graphic Designer

- Led design and execution of high-impact marketing collateral, contributing to a 10% revenue increase for local campaigns.
- Streamlined cross-department production workflows, increasing team productivity by 50% while upholding quality standards and achieving a 95% client retention rate.

EDUCATION & CERTIFICATIONS

- Bachelor of Fine Arts (BFA), Towson University, Towson, MD | 2020
- Certificate, Full-Stack Web Development, University of Washington, Seattle, WA | 2021
- React (Intermediate) & Front-End Developer Certifications, HackerRank | 2023
